

VANSH SUTHAR

MERN STACK DEVELOPER

+91-7043459404 | sutharvansh022@gmail.com | github.com/VanshSUTHAR

SUMMARY

Dedicated and detail-oriented developer who enjoys solving problems and building meaningful solutions. Takes pride in writing clean, organized code and continuously improving through learning. A quick learner and team player who values collaboration and growth.

EXPERIENCE

MERN Intern (Concatstring Solutions Private Limited)

06/2025 – Present

Concatstring Solutions Private Limited

- Developed and maintained full-stack web applications, ensuring performance, scalability, and reliability.
- Built responsive and user-friendly interfaces with a focus on smooth user experience.
- Designed and integrated RESTful APIs to support seamless frontend-backend communication.
- Worked with databases to manage and optimize data efficiently, while maintaining version control and collaboration through Git.

PROJECTS

Online Book Store Web Application

online-books-frontend.vercel.app

- Built a user-friendly platform for browsing and exploring a wide collection of books with smooth navigation.
- Implemented search and interactive UI features to enhance user experience and accessibility.
- Deployed the application on a cloud platform for fast performance and reliable availability.

Company Assets Dashboard

companydashboard.netlify.app

- Developed a full-stack asset management platform for tracking company assets, inventory, and employee allocations.
- Implemented employee management, multiple asset assignments, serial number tracking, and accessories management with dynamic asset assignment workflows.
- Built responsive UI components and integrated Supabase for real-time data handling, enabling seamless asset monitoring and management across the organization.

Expense Manager

expense-mangager-qmeh.vercel.app

- Engineered a full-stack financial management platform enabling users to track income, expenses, bank accounts, credit cards, and loan records in one place.
- Designed and implemented real-time financial tracking, transaction categorization, and account management features for improved budgeting and expense control.
- Leveraged React.js, Node.js, Express.js, and MongoDB to deliver a scalable, responsive, and secure application with an intuitive user experience.

SKILLS

Frontend HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS / Bootstrap, Responsive Web Design

Backend Node.js, Express.js, RESTful APIs

Database MongoDB, Supabase (PostgreSQL, Authentication, Realtime)

Tools Git & GitHub, Postman, Vercel / Render (Deployment)

EDUCATION

Bachelor of Computer Science and Technology

2022 – 2026

LJ Institute of Engineering and Technology, LJ University

ONLINE CERTIFICATES

- Exploratory Data Analysis for Machine Learning – IBM
- HTML, CSS, and JavaScript for Web Developers – Johns Hopkins University
- Database Design and Basic SQL in PostgreSQL – University of Michigan
- Inheritance and Data Structures in Java – University of Pennsylvania
- Introduction to Java – LearnQuest
- Building Generative AI-Powered Applications with Python – AWS
- Cloud Technical Essentials – AWS
- Machine Learning with Python – IBM
